Fortum's strategy

Our vision: For a cleaner world

Our mission:

We engage our customers and society to drive the change towards a cleaner world. Our role is to accelerate this change by reshaping the energy system, improving resource efficiency and providing smart solutions. This way we deliver excellent shareholder value.

Drive focused growth in the power value chain

Build options for significant new businesses

Ensure value creation from investments and portfolio optimisation

Pursue operational excellence and increased flexibility

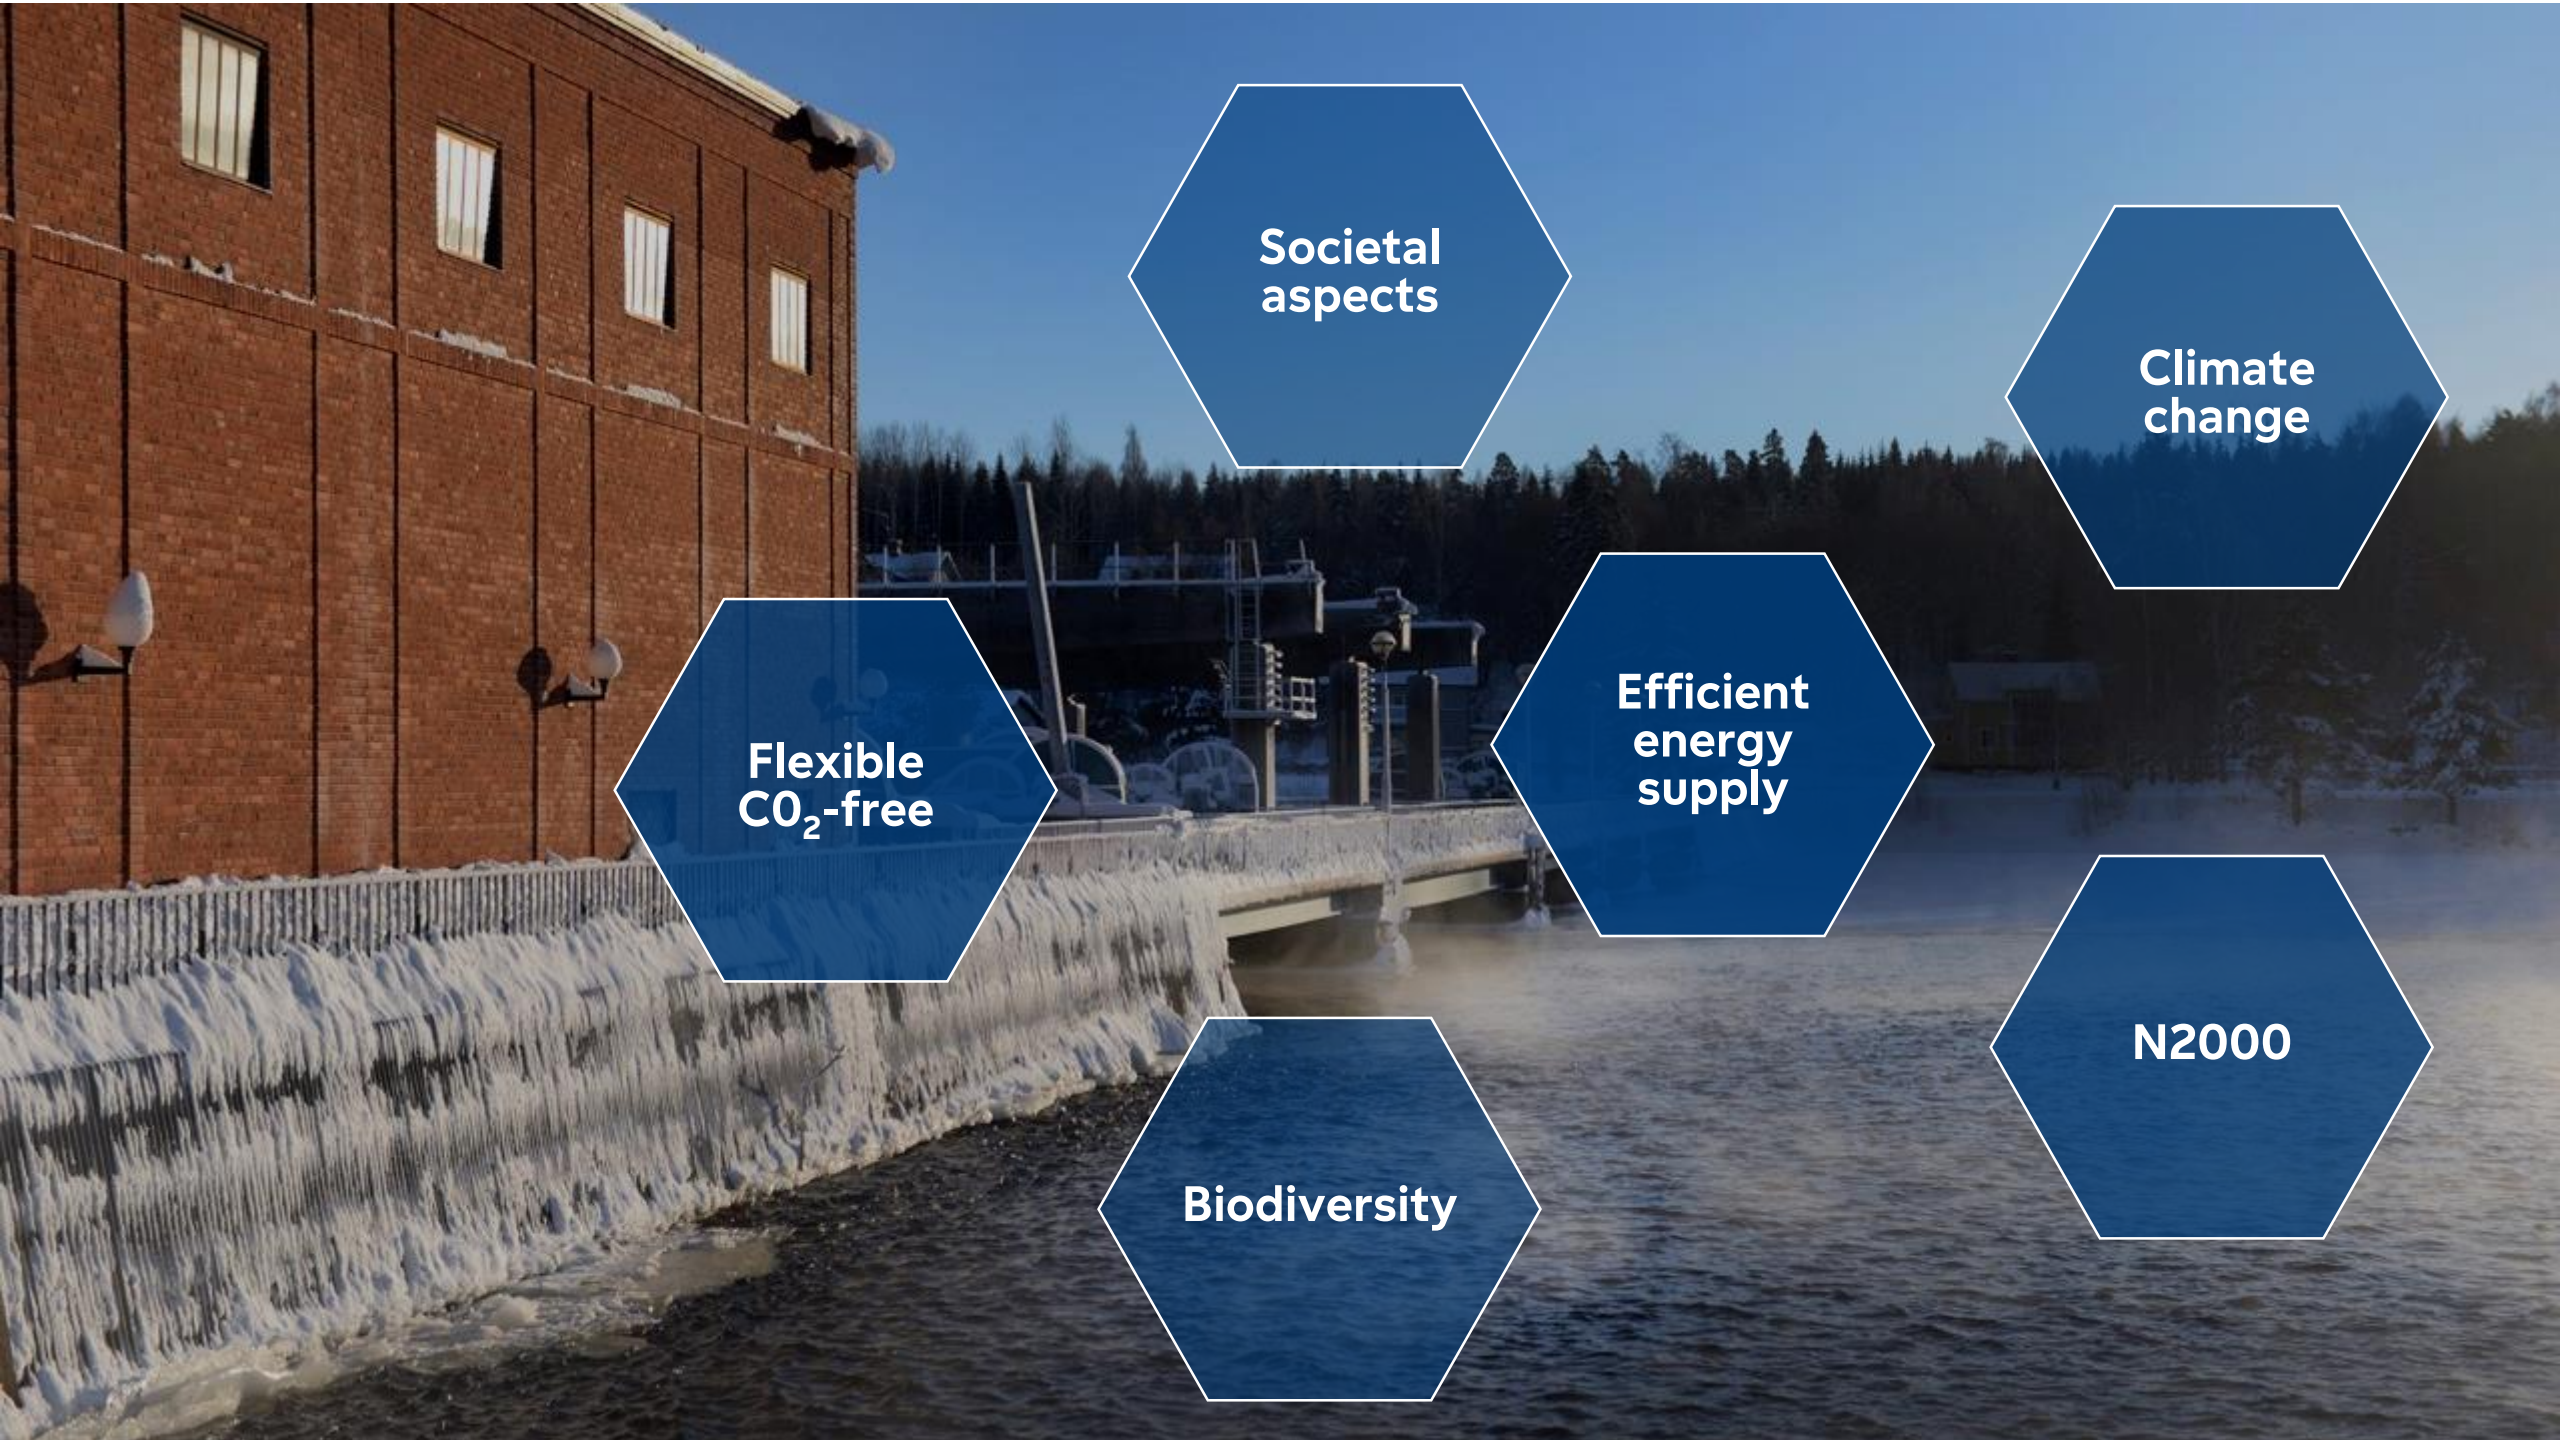

Main drivers for change:

Climate and environment

Politics and regulation

Technology development

**Societal
aspects**

**Climate
change**

**Flexible
CO₂-free**

**Efficient
energy
supply**

N2000

Biodiversity

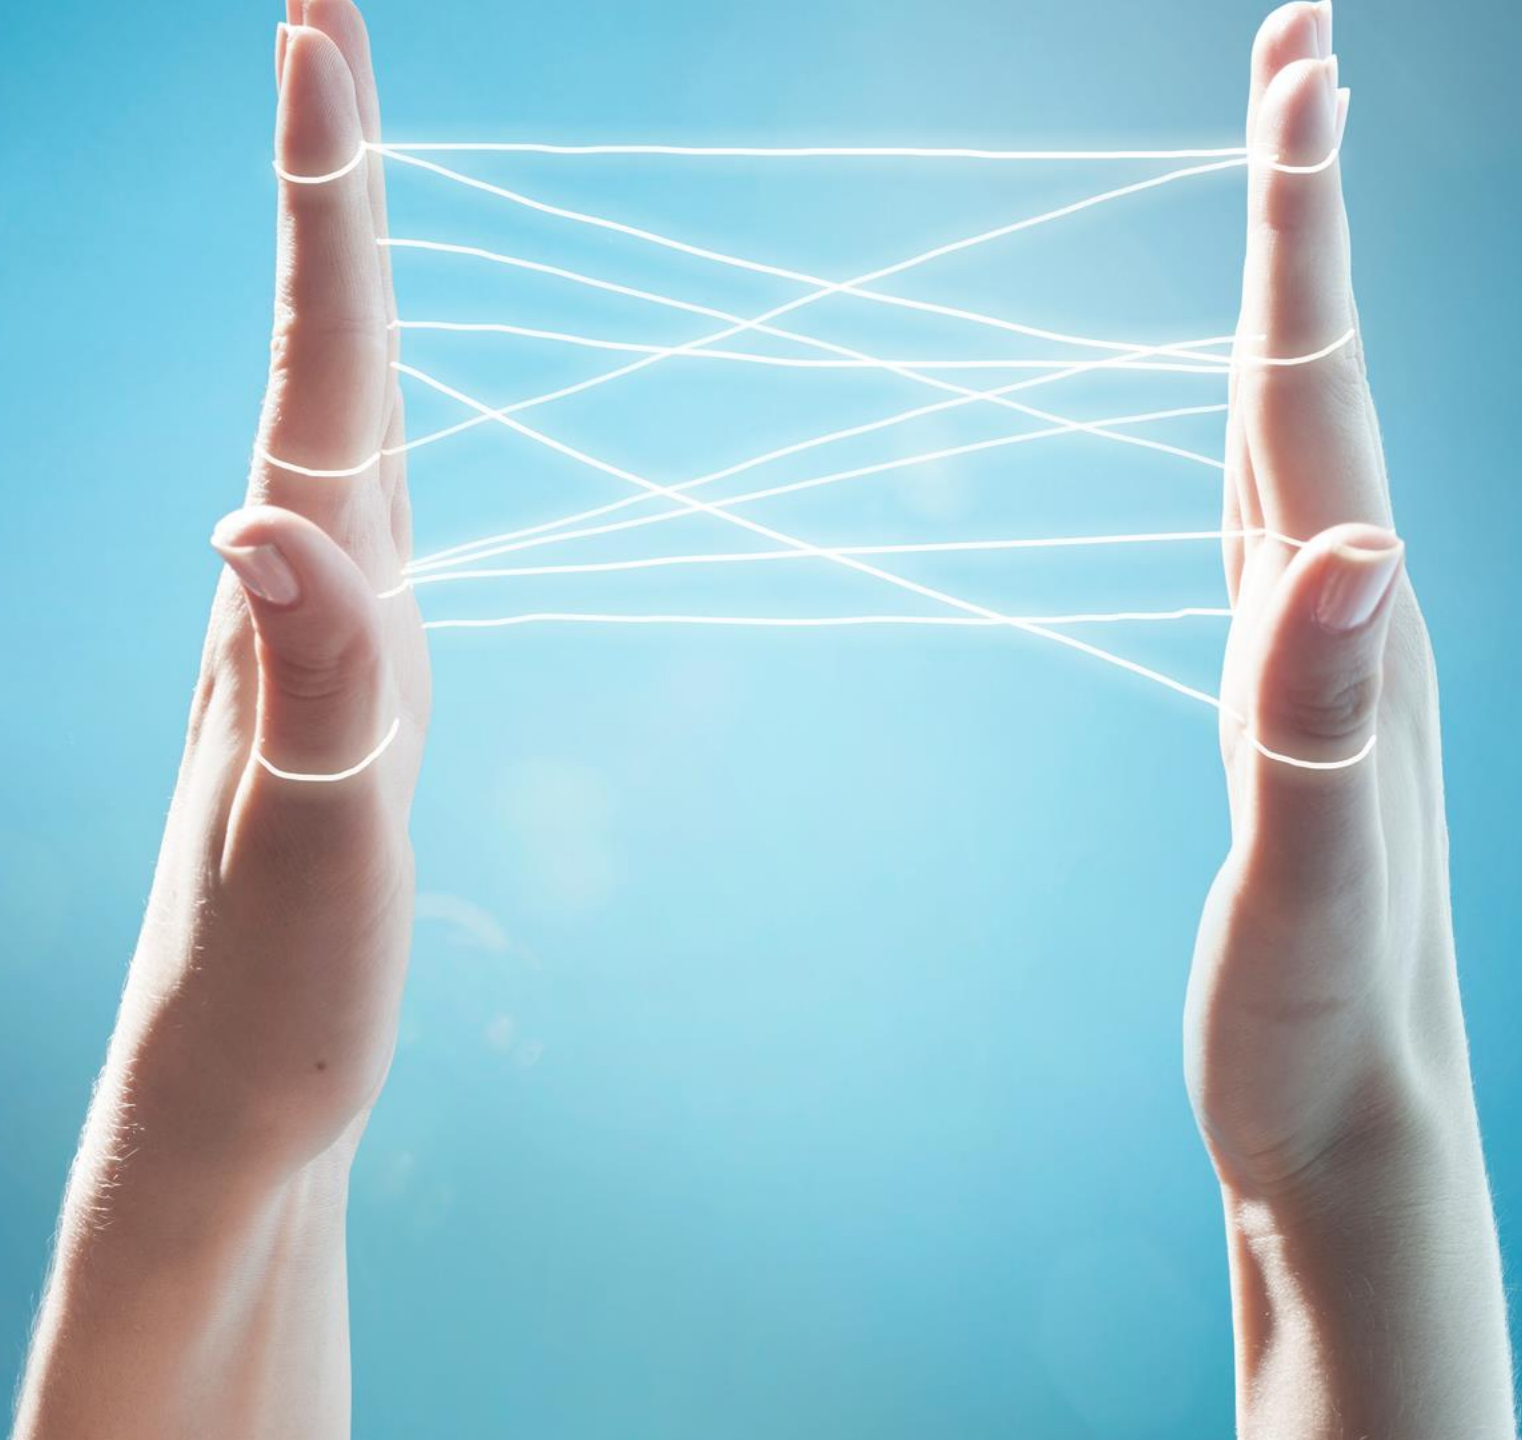

Förslag till nationell plan för omprövning av vattenkraft

Med beskrivning av vattenmiljö och effektiv tillgång till vattenkraftsel samt identifierade behov för fortsatt arbete

National plan for modern environmental conditions

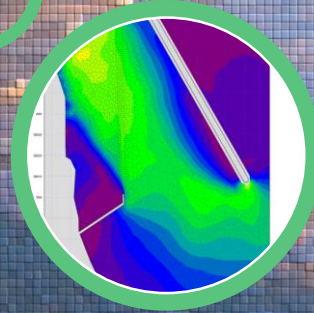

Ecohydraulic approach

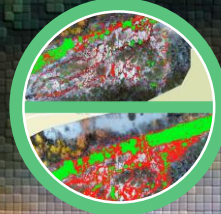

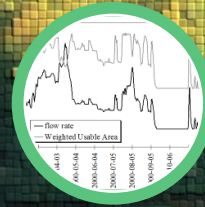

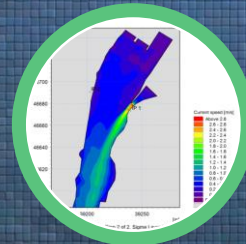

Habitat suitability

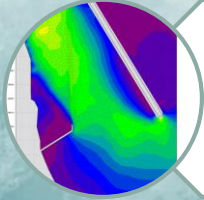

Modifications and measures

Flow suitability

Building blocks for scalable ecohydraulic modelling tools

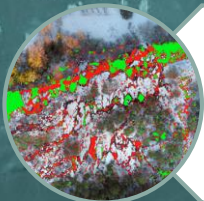

Hydraulic models

Biological data

Spatiotemporal scales

Population impacts

Data driven approach

- Improve data availability
- Identify gaps in information
- River system scale
- Measurable effects
- Understandable & Comparable results
- Effective and sustainable environmental improvements
- Local conditions make all the difference - Change where it matters!

Change where it matters
