

Machine faults detected with Trendion Online –vibration monitoring system

Energiforsk – Vibrations in nuclear applications annual seminar 2024

Espoo, Finland 6.11.2024

Jaakko Rostedt and Olli Kuuluvainen

Trendion
Peace of Mind

Condition monitoring of rotating machinery, web-based measurements and analysis

- **General properties of Trendion Online System**
- **Examples of machine faults detected**
 - Gear tooth failure
 - Rolling bearing failure
 - Failure in slide bearing
 - Insufficient lubricant inside rolling bearing
 - Sudden unbalance
 - Loose piston retaining nut
- **One minute, Who we are and what we do.....** <https://youtu.be/Lc7lCbllK0u4?feature=shared>
- **Trendion Online live demonstration**
- **Q&A**

*With cost-effective Trendion Online -system,
you can make your everyday work easier!*

For your peace of mind

Trendion

THANK YOU!
